ASTORstuck Stucco Tape

Separation strip made of closed-cell PE foam with one-sided self-adhesive tape strip in the edge area, suitable for sealing, stretch, and masking tape in dry construction applications.

Application

- Reduces / prevents tension and cracks in plaster finishes when used for suspended ceilings and partition walls.
- Prevents cold bridges in walls, provides a secure seal against capillary effects
- Suitable for fittings in the roof area and for shadow joints
- Effectively prevents zigzag cracks in dry and wet construction
- For use in drywall wet plaster: roof extension, wooden beams, gypsum plasterboard, gypsum boards, windowsills, plastic windows, roof cornice

Benefits and Properties

- Self-coiled, without waste of silicon paper
- Rolls in use remain closed, i.e. do not fall apart; hence no additional securing by a needle needed
- Siliconized, dirt-repellent, protective outer skin
- Easy and clean cut-off of the excess of the tape, as only 9 mm adhesive are applied at the edge
- High resistance to aging, insensitive to moisture
- Immediate continuation of work possible, as no drying time is necessary

Technical Data

Carrier	closed-cell polyethylene foam, white colour
Adhesive	rubber based hotmelt adhesive
Density	ca. 30 kg/m ³
Service temperature	- 40°C to +80°C

The benefits of ASTORstuck speak for themselves

without needle

without protective paper strip

ease of use

without re-winding

Markets & Applications

ASTORtec products find their place in various industries.

ASTORtec offers an ideal range of products for the **building industry** for interior fittings and roofing. The products are used in drywall construction, roof and facade construction and many other building trades. ASTORtec also offers semi-finished products for further industrial processing such as the production of building profiles.

Pressure-sensitive adhesives are used in countless applications. The business area "**Converting Industry**" covers the most diverse industries such as such as **sports equipment, furniture, shoe industry, mechanical engineering and white goods**. Tailor-made solutions can be offered for these applications.

ASTORtec is your partner for tailor-made **pressure-sensitive adhesive solutions** and for **contract coatings** of all kinds. We are open for new developments and projects in partnership. Please contact us for joining forces in your development of pressure-sensitive adhesive solutions.

Window and mirror manufacturers use ASTORtec products every day for sealing, bonding, mounting and protecting. ASTORtec has the right products for protection the products in these applications.

The business segment of transportation comprises general vehicle construction. Our customers are in the automotive and automotive supply industry, rail stock construction, transport vehicle construction, shipbuilding or cabin construction. ASTORtec offers high-quality and efficient anti-slip mats for securing loads.
